About

I am pursuing a Bachelor of Science in Computer Science at the University of Calgary, very interested in AI, Machine learning, and self-driving technology. I am proficient in Java and Python and knowledgeable in software engineering principles. I have academic project management experience, AWS experience, and a strong ability to think abstractly about complex systems. I have some experience with relational databases in SQL, and static website hosting experience with AWS.

Experience

Amazon

Ambassador

Dec. 2023 - Present

- Perform regular audits on warehouse technology.
- Update device software, re-validate certificates, and troubleshoot errors.
- Train new associates on warehouse technology and process paths.

Warehouse Associate

Sept. 2020 – Present

- Work in a team to sort through a large volume of daily customer orders.
- Train new associates on how to read package labels and sort accordingly.
- Utilize technology like scanners, laptops and handheld printers.

Google AI Research School

Dec. 2022 - May 2023

AI Research Student

- Received certificate from the Google AI Research School.
- Researched various methods for AI image upscaling.
- Worked in a team to develop an AI upscaling model using Python.

Writer

Sept. 2020–Present

- Published three short stories for online literary magazines

Programming Languages

- Most experienced with Java; objected-oriented programming, JUnit testing, JavaFX.
- Some experience with Python, C and Armv8 Assembly (AArch64).
- Dabbled in SQL, HTML, and CSS.

Education

University of Calgary

Sept. 2023 - Present

Bachelor of Science in Computer Science

Skills

Java, AWS, Python, Git, C, Armv8 Assembly, Bilingual (English, Arabic), Organization skills, Leadership, Teamwork; MS Office, IntelliJ, VSCode, Eclipse.

Achievements

- Launched a website portfolio entirely using AWS.
- Google AI Research School Certificate
- Intro to Cloud Computing Certificate from Codecademy
